SUMMARY

Lead full-stack engineer with 10+ years building and scaling web products end-to-end across frontend, backend, and cloud. Strong in system design, architecture, and 0-to-production delivery. Experienced leading small teams (2–5 engineers), mentoring juniors, and driving complex initiatives across multiple services and stakeholders.

AI-assisted delivery: use AI coding tools to speed up scaffolding/refactoring and test/doc generation while maintaining quality gates (PR reviews, linting, automated tests, and security checks).

CORE SKILLS

- **Languages:** TypeScript, JavaScript, Python | **Exposure:** Java (Spring Boot – built REST APIs)
 - **Frontend:** React, Next.js, Redux, Tailwind CSS, HTML5, CSS3, Bootstrap
 - **Backend:** Node.js, NestJS, Express, FastAPI | REST APIs | Auth (JWT, OAuth basics)
 - **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB
 - **Cloud:** AWS (EC2, ECS/Fargate, Lambda, API Gateway, S3, SQS/SNS, CloudWatch, Amplify) | Azure AD (SSO), Azure Storage
 - **Caching/Messaging:** Redis, RabbitMQ | event-driven patterns
 - **DevOps:** Docker, Docker Compose, Kubernetes | CI/CD (GitLab CI, Jenkins, GitHub Actions)
 - **Engineering:** System Design, Architecture Reviews, Code Reviews, Mentoring, Agile/Scrum
-

EXPERIENCE

7-Eleven — Bengaluru | Apr 2023 – Present

Lead Full-Stack Engineer

- Lead delivery for key modules in a microservices platform; drive design, reviews, and execution across frontend and backend.
- Own frontend architecture for a large Next.js application (standards, reusable components, performance, maintainability).
- Owned authentication platform: Azure AD (SSO) integration and secure session management via a Node.js auth service; implemented RBAC (roles + business functions).
- Contributed to backend services in Python (FastAPI) and Node.js, building REST APIs and collaborating on service contracts.
- Contributed to PostgreSQL data modeling (schemas, indexes) and Redis caching to support reliable and scalable delivery.
- Mentor ~5 engineers through code reviews, pairing, and design walkthroughs; raise quality and ownership.

Kaleyra — Bengaluru | Dec 2020 – Mar 2023

Software Engineer – Lead (Full Stack)

- Owned end-to-end delivery across React UI and NestJS services for omnichannel workflows (SMS/WhatsApp/Voice).
- Implemented caching and asynchronous processing using Redis + RabbitMQ; improved throughput and reliability.
- Built and operated AWS components (API Gateway, Lambda, S3) with CloudWatch logs/metrics/alerts for production readiness.
- Led 2 engineers; drove planning, reviews, and release readiness.

Synechron — Bengaluru | Jan 2019 – Dec 2020

Lead – Technology

- Delivered enterprise web modules for banking clients; owned workflows (including approvals) from requirements through production release.
- Built React + Redux SPA modules integrating REST APIs with predictable state management and reusable UI patterns.
- Improved maintainability via testing (Jest), code reviews, and clean module boundaries.

Joulestowatts Business Solutions — Bengaluru | Feb 2018 – Jan 2019

Module Lead

- Led a team of 3 engineers to deliver reporting/portal features with clear ownership and predictable execution.
- Built React + Redux-Saga modules and supported Node.js APIs; containerized services using Docker and supported Kubernetes deployments.

Mindtree — Bengaluru | Jan 2016 – Jan 2018

Senior Software Engineer

- Developed and maintained Drupal 7 applications with custom modules and MySQL-backed integrations.
- Contributed to modernization by building selected UI modules using React/Node.js alongside the existing platform.

Maverick Global InfoSoft — Bengaluru | May 2015 – Dec 2015

Web Developer

- Built web applications using PHP (Yii2) and JavaScript; owned features end-to-end including database design and production support.
-

SELECTED PROJECTS

REPS (Real Estate Platform) — 7-Eleven

- Built an internal real-estate platform to process lease document batches (ZIP/XML), normalize data into PostgreSQL, and deliver searchable property/lease insights for internal stakeholders.
- Implemented Azure AD (SSO) login with a Node.js session-based auth service and RBAC (roles + business-function permissions), including admin role management.
- Delivered property onboarding workflows and rich data exploration UI using Next.js + AG Grid; improved ingestion transparency through validation and batch-level audit/status tracking.
- Built a scalable AWS ingestion pipeline for large batch processing using S3 → SQS/SNS → ECS Fargate → RDS (PostgreSQL) with retries and DLQ patterns.

Stack: Next.js (TypeScript), Node.js/NestJS, Python (FastAPI), AWS (S3, SQS, SNS, ECS Fargate, RDS PostgreSQL), Redis, Azure AD (SSO), AG Grid

Draws Module (Financial Management System) — 7-Eleven

- Delivered a Draws request workflow supporting one-time and recurring schedules (weekly/monthly), capturing payee contact/bank details and paid-in-capital information.
- Built admin review console to manage lifecycle (pending/approved/rejected) with Azure SSO and role-based access.
- Implemented FastAPI endpoints and PostgreSQL schema changes for validation/auditability; stored supporting documents/attachments in S3.

Stack: React, Python (FastAPI), PostgreSQL, Azure AD (SSO), AWS S3

Linkmetrics.io (Buyer–Seller Marketplace for SEO Backlinks) — Product

- Built a multi-sided marketplace connecting buyers and sellers for content placement; managed workflow from discovery and purchase to publication and buyer approval.
- Integrated PayPal (global) and Razorpay (India) with currency conversion, refunds/withdrawals, and admin-led dispute resolution (full/partial/no refund).
- Automated invoice generation via SNS + Lambda, stored PDFs in S3, served via pre-signed URLs; used Redis caching for high-traffic listings and rates.

Stack: Next.js (Buyer/Seller/Admin), NestJS, PostgreSQL (RDS), Redis, ECS Fargate, AWS Amplify, Lambda, SNS, S3, PayPal, Razorpay

Kcloud Communication Platform (SMS / WhatsApp / Voice) — Kaleyra

- Built multi-channel communication workflows by delivering React UI modules and NestJS APIs used by internal/customer-facing operations.
- Improved reliability and responsiveness using Redis caching and asynchronous processing; led 2 engineers in a ~15-member team.

Stack: React (TypeScript), Tailwind, Redux, NestJS, Redis, RabbitMQ, MySQL, MongoDB, AWS

Additional projects (brief): Wholesale Banking Admin (Approvals Module) — React/Redux, Node/NestJS | Cancer Care Platform — patient journey, payments, video (React, Node.js, PostgreSQL, AWS)

CERTIFICATIONS & TRAINING

- Blockchain (Certificate Program) — IIT Kanpur
- Node.js Certification — Edureka
- React.js Certification — SpringPeople

EDUCATION

MCA, R V College of Engineering (VTU University) — 2013

BCA, S B College Gulbarga — 2010
